Price List for Spring 1951  
(Revised March 1st)

OWN-ROOT LILACS, MOCK ORANGE, FLOWERING ALMONDS, PLUMS, ETC.

The GARDNER NURSERY LILAC COLLECTION contains most of the finest varieties of FRENCH LILACS in existence. We say the finest because our varieties are so listed by "Lilacs for America." We have 99 of the 100 listed as the very best, and practically all our varieties are in the recommended list of that publication.

We also have most of the Lilac species and many of the Hybrids between species, including practically all of the fine new Canadian Early Lilacs and many of the late Canadians. In all, we have more than 250 varieties of Lilacs, many so new and rare that they are offered by few nurseries.

Over 120 varieties of Lilacs are offered in this list, many of them scarce because they are new or difficult to propagate. The varieties and plant sizes we have to offer for Fall delivery are shown. Scarce varieties are marked with one \* after the name. We recommend that our customers indicate a second choice, if possible, when they order scarce items. We will not substitute unless the customer asks us to do so and we do not buy in stock to fill orders when we are short.

-----  
OWN-ROOT LILACS

People familiar with Lilacs know the importance of having lilacs grown on their own-roots. Such plants are easier to start and are as hardy and as long living as a common lilac. Grafted lilacs seldom do well until they produce their own roots. Some take years to do that, many never do and remain stunted and eventually die.

Producing OWN-ROOT Lilacs is slower and more costly than propagation by grafting; therefore true OWN-ROOT Lilacs are offered by only a few specialists.

Every GARDNER Lilac offered is a genuine OWN-ROOT plant, never a privet graft that may some day have it's own-roots if planted deep. Every plant is grown right here in our nursery.

TERMS: Cash with order or 25 per cent payment with order, balance C.O.D. All Lilacs and other Shrubs shipped by express customer to pay all transportation cost. No charge is made for packing.

Instructions on planting and care will be included with each shipment of lilacs.

The following is a list of lilac varieties and sizes of plants we have to offer for Spring and Fall of 1951 delivery. For ease in finding each of the many lilacs we have, all varieties are listed in alphabetical order. The Vulgaris Varieties, called French Hybrids, have prices quoted for the sizes of plants we have to offer. Other types of lilacs have reference as to where they will be found listed as: Early Lilacs; Late Lilacs; Fall Bloomers. We have larger plants than 3-4 ft. on some varieties. If interested, ask for sizes and prices.

Lilac Edward J. Gardner D. Pink (Gardner Seedling No. 443)  
(Patent applied for)

This is the beautiful double pink lilac, visitors so much admired during our lilac displays of the past two years. We did not intend starting sale of this variety for at least another year in order to build up a good stock, but there was so much demand for the plant that we named it and applied for a patent on it and are offering a few plants for 1951 delivery. The buds are of a mauve pink shade that lightens as the flowers open, the blooms becoming a beautiful light pink that glows in the sunlight, making a striking effect and attracting everyone's attention. The individual florets resemble a hyacinth floret in form and measure 7/8" across and are double. Two to three rows of petals appear to come from a single corolla. The inner petals are narrow and deeply channeled, outer petals broad and recurved. The bloom panicles are large and loosely branching often showing five to eight separate spikes to the cluster. As a cut flower the keeping qualities are very good and the blooms are quite fragrant. The plant is a strong and rapid grower.

Price:	12-18"	-	5.00
	18-24"	-	7.50
	2-2½ ft	-	10.00
	3-4ft	-	15.00

EDW. J. GARDNER NURSERY, 201 Rich St., Horicon, Wisconsin

EARLY LILACS

This class bloom a few days to a week or more earlier than the common lilac, *Vulgaris*, and the French Hybrids. Clusters are usually very large and graceful. The Canadian varieties (marked Can.) are of very recent introduction and the demand for them is increasing very rapidly. Remember that these lilacs, like all others we offer are strictly OWN-ROOT.

LATE LILACS

Under this heading we are grouping all the different lilac species, varieties and hybrids that bloom after the common and the French lilacs have bloomed. They bloom two weeks or more after the French lilacs, thus greatly lengthening the lilac season. All have single flowers. Of course all our late lilac plants are on their OWN-ROOTS. Abbreviations after the name indicate the parentage as follows:

- PR - Prestoniae--Villosa X reflexa
- JF - Josiflexa--Josikaed X reflexa
- NAN - Nanceianna--Henryi X Sweginzowi
- SF - Villosox X Sweginzowi
- HT - Henry l X Tomentello

FALL BLOOMERS

We believe the following two lilacs merit special mention because they are so different from any of the other lilacs, and while they bloom heavily in Spring they also bloom again intermittently during the Summer and Fall. They resemble each other considerably in color and type of flower. Potanini is of more upright growth and the small leaf is quite olive green, while the Microphylla Superba foliage has a more blush tone and the bush is more spreading in growth. The Potanini buds are bright coral and ornamental for a long time before the flower opens. The blossoms are pinkish white with red throats. Microphylla Superba has about the same shade of buds and flowers though the throat markings are not as pronounced as on the Potanini.

# The Gardner Nursery 1951 Peony Price List

Peonies are the most easily grown of all the hardy flowering plants. Each year they produce a wealth of gorgeous blooms over a period of several weeks. With a little care the plants live and produce for many years, therefore it pays to plant only the finest varieties. Our list contains many of the highest rated varieties.

## TERMS ON ORDERS FOR PEONIES

Cash with order or 25% payment with order, balance C. O. D. We pay postage on all peony orders amounting to \$5.00 or more. Add 25 cents to cover postage and packing on orders under this amount. If plants are sent C. O. D. the collection charges are charged to the customer.

If orders include both peonies and lilacs or other shrubs, the peonies are sent by mail post paid, but the shrubs are shipped express, customer to pay all transportation charges. We start filling peony orders early in September and the bulk of the shipping is done just after the middle of the month. We can ship at any time from September 1st to October 31st, if customer indicates desired date.

# B'ABY LILAC PLANTS

The following varieties are offered in transplanted field grown plants for Fall delivery. Plants are strong and well rooted but they should not be planted directly into borders except where they will not be in competition with larger shrubs but rather should be grown in the garden for one or more years before they are transplanted into the borders. We are rooting cuttings of these and many other varieties this Summer which we expect to raise in pots for Spring delivery. If interested, ask for our price list which will be sent out after February 1st.

Price List for Fall 1950  
(Revised July 1st)

OWN-ROOT LILACS, MOCK ORANGE, FLOWERING ALMONDS, PLUMS, ETC.

The GARDNER NURSERY LILAC COLLECTION contains most of the finest varieties of FRENCH LILACS in existence. We say the finest because our varieties are so listed by "Lilacs for America." We have 99 of the 100 listed as the very best, and practically all our varieties are in the recommended list of that publication.

We also have most of the Lilac species and many of the Hybrids between species, including practically all of the fine new Canadian Early Lilacs and many of the late Canadians. In all, we have more than 250 varieties of Lilacs, many so new and rare that they are offered by few nurseries.

Over 120 varieties of Lilacs are offered in this list, many of them scarce because they are new or difficult to propagate. The varieties and plant sizes we have to offer for Fall delivery are shown. Scarce varieties are marked with one \* after the name. We recommend that our customers indicate a second choice, if possible, when they order scarce items. We will not substitute unless the customer asks us to do so and we do not buy in stock to fill orders when we are short.

OWN-ROOT LILACS

People familiar with Lilacs know the importance of having lilacs grown on their own-roots. Such plants are easier to start and are as hardy and as long living as a common lilac. Grafted lilacs seldom do well until they produce their own-roots. Some take years to do that, many never do and remain stunted and eventually die.

Producing OWN-ROOT Lilacs is slower and more costly than propagation by grafting; therefore true OWN-ROOT Lilacs are offered by only a few specialists.

Every GARDNER Lilac offered is a genuine OWN-ROOT plant, never a privet graft that may some day have it's own-roots if planted deep. Every plant is grown right here in our nursery.

TERMS: Cash with order or 25 per cent payment with order, balance C.O.D. All Lilacs and other Shrubs shipped by express, customer to pay all transportation cost. No charge is made for packing.

Instructions on planting and care will be included with each shipment of lilacs.

EDW. J. GARDNER NURSERY, 201 Rich St., Horicon, Wisconsin

The following is a list of lilac varieties and sizes of plants we have to offer for Fall 1950 delivery. For ease in finding each of the many lilacs we have, all varieties are listed in alphabetical order below. The Vulgaris Varieties, called French Hybrids, have prices quoted for the sizes of plants we have to offer. Other types of lilacs have reference as to where they will be found listed as: - Early Lilacs; Late Lilacs; Fall Bloomers. We have larger plants than 3-4 ft. on some varieties. If interested, ask for sizes and prices.

BABY PLANTS: Where time is not an object and the customer is ready to give the extra care necessary, small Lilac plants, commonly called BABY PLANTS may be used with a considerable saving of cost. We are offering, on a separate list, transplanted, field grown small plants of many lilacs for Fall delivery. Many of these varieties are in such great demand that it may be years before we can list them in 18-24" or larger sizes. In Spring we expect to have potted plants of the scarcer lilacs to offer. If interested, ask for list of BABY PLANTS.

In the following list S. indicates the individual flowers are Single, D. means they are Double.

## Gardner's #443 (Patent applied for). D. Pink

This is the beautiful, double, pink lilac, visitors so much admired during our lilac displays of the past two years. We did not intend starting sale of this variety for at least another year in order to build up a good stock, but there was so much demand for the plant that we finally applied for a patent on it and are offering a few plants for Fall delivery. The buds are of a lilac purple shade but the color lightens as the flowers open, the blooms eventually becoming a beautiful light pink that glows in the sunlight, making a striking effect, attracting everyones attention. The individual florets resemble a hyacinth floret in form and measure 7/8" across and are double. Two to three rows of petals appear to come from a single corolla. The inner petals are narrow and deeply channelled, outer petals broad and recurved. The bloom panicles are large and loosely branching often showing five to eight separate spikes to the cluster. As a cut flower the keeping qualities are very good and the blooms are quite fragrant.

Price:	18-24"	-	\$5.00
	2-2½ft	-	7.50
	3-4ft	-	10.00

## EARLY LILACS

This class blooms a few days or a week or more earlier than the Vulgaris or French Hybrids. Clusters are usually very large and graceful. The Canadian varieties (marked Can.) are of very recent introduction and we expect they will become popular as stocks become available. Remember that these lilacs, as well as all others that we sell, are strictly OWN-ROOT.

LATE LILACS

Under this heading we are grouping all the different lilac species, varieties and hybrids that bloom after the common or French lilacs have bloomed. Our stocks of these lilacs are too low to give any of them detailed description. Lilac enthusiasts and those who have seen them in our fields will recognize the sorts they desire from the short descriptions given. Of course the plants are OWN-ROOT. Abbreviations after the name indicate the hybrid parentage as follows:

PR = *villacea* x *reflexa*  
 JF = *josikaea* x *reflexa*  
 NAN = *henryi* x *swezeyi*  
 VS = *swezeyi* x *reflexa*  
 VS = *villacea* x *swezeyi*  
 HT = *henryi* x *tomentella*

Rutilant NAN	S. Purple		3.25	4.00	4.50	5.00

FALL BLOOMERS

We believe the following two lilacs merit special mention because they are so different from any of the other lilacs, and while they bloom heavily in Spring they also bloom again intermittently during the Summer and Fall. They resemble each other considerably in color and type of flower. Potanini is of more upright growth and the small leaf is quite olive green, while the Microphylla Superba foliage and the bush is more spreading in growth. The Potanini buds are bright coral and ornamental for a long time before the flower opens. The blossoms are pinkish white with red throats. Microphylla Superba has about the same shade of buds and flowers though the throat markings are not as pronounced as on the Potanini.

		18-24"	2-2½ft
	Microphylla Superba		2.75 3.50
	Potanini		3.75

As we mentioned before, we have over 250 varieties of lilacs in our fields. We also have over 200 fine varieties of peonies in our two acres of these plants. Both our lilac and peony shows are visited by several thousands each season. Blooming dates vary greatly from year to year. We send out post cards advising the dates each show will be best to our customers and others who are interested. If you wish to visit our displays next year, advise us, and your name will be entered on our mailing list. Remember you are welcome at any time to visit our nursery located on Highway 33 2 1/2 Miles East of Horicon, Wisconsin.

Price list for Fall of 1950  
(Revised July 1st)

DOUBLE, SINGLE, AND JAPANESE PEONIES

Peonies are the most easily grown of all the hardy flowering plants. Each year they produce a wealth of gorgeous blooms over a period of several weeks. With a little care the plants live and produce for many years. therefore it pays to plant only the finest varieties. Our list contains many of the highest rated varieties.

**SIZE OF PLANTS**--All plants sold are strong divisions, 3 to 5 eyes or more, with a good root system. Strong plants that usually bloom the first year and with proper care, quickly develop into large clumps.

**PLANTING AND CARE**--Fall planting is best for Peonies. Set them anytime before the ground freezes. Set the roots so the buds or eyes are upright. Plant the roots so the buds are just about 2 inches below the surface. Do not plant too deep or the plants may fail to bloom.

The first Winter, hill the ground slightly over the plants and cover with a little straw or coarse mulch but avoid leaves or anything that may become too wet. Remove mulch and level the ground after ground thaws in Spring. Feed peonies with a little commercial fertilizer several times each Summer. Spread it around the plants, not on them, and hoe it into the ground.

**TERMS:** Cash with order or 25% payment with order, balance C.O.D. We pay postage on all peony orders amounting to \$5.00 or more. Add 25¢ to cover postage and packing on orders under this amount. If plants are sent C.O.D. the collection charges are charged to the customer. If orders include both peonies and lilacs or other shrubs, the peonies are sent by mail post paid, but the shrubs are shipped express, customer to pay all transportation charges. We start filling peony orders early in September and the bulk of the shipping is done just after the middle of the month. We can ship at any time from Sept 1st to Oct. 31st., if customer indicates desired date.

LILACS

We have a very large collection of Lilacs: French Lilacs of all colors, both Double and Single; Early Hybrids, Species and Late Hybrids, in all, over 250 varieties.

Visit our Lilac Show in Spring. If interested, we will notify you of show dates on request.

JAPANESE PEONIES

Akashigata	Rose & Gold	2.00
Ama-No-Sode	Light Pink & Yellow	3.00
Aureolini	Pink & Yellow	1.50
John Gardner (Gardner)	Bright Red disc fading to rosy red with a center of bright red petaloïdes, each bordered with an edge of brightest gold. A fine landscape variety as it is a heavy bloomer and does not grow too tall. Visitors to our nursery always admire this peony and it has been our best selling variety during the past three seasons.	4.00
Mikado	Red & Gold	1.50
Nippon Beauty	Red	3.00
Nippon Gold	Pink	2.50
Some Genoka	Dark Red	1.50
Tokio	Pink & Yellow	1.50
